- **Adjustable Sash Rollers:** For smooth and quiet operation
- **Door can be Mullered with Side Lites or Transoms:**
- **Lifetime Limited Warranty**

Equinox Patio Door Series

Within their converse beauty, the spring and fall equinox consistently mark differences in the energy of the sun on our environment. In a like manner, the Equinox Vinyl Patio Door is also a constant for dependability, beauty, and the ultimate in climate control efficiency.

The Equinox Vinyl Patio Door combines an exceptional design with outstanding performance in a product that maximizes light and view, thermal efficiency, security, and an effortless ease of operation.

Best of all, the Equinox Vinyl Patio Door is an Earthwise Vinyl Window product. Earthwise window products are guaranteed to last a lifetime and will improve the comfort and appearance of your home.

So make the intelligent choice in windows and doors. Be Window-wise, choose a window or door by Earthwise.

The insulated glazing in the Equinox patio door is constructed using warm-edge technology, as well as tempered safety glass, so it holds up to the weather while allowing you to experience the beauty of the great outdoors.

Constructed from low-maintenance vinyl extruded materials the frame and panels are welded at the corners during assembly to provide a product superior in strength, performance, and appearance. Reinforcement is used at the meeting rails and at the lock points of the frame and panel for added rigidity and strength.

Our sliding door secured with color matching die cast handle sets or optional Signature Series handle sets. (Shown Above)

The sliding door operates smoothly on heavy duty steel tandem rollers.

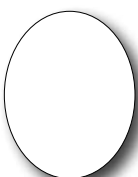

Optional kick lock provides additional security.

3/4" White Contoured

Simulated Divided Lite

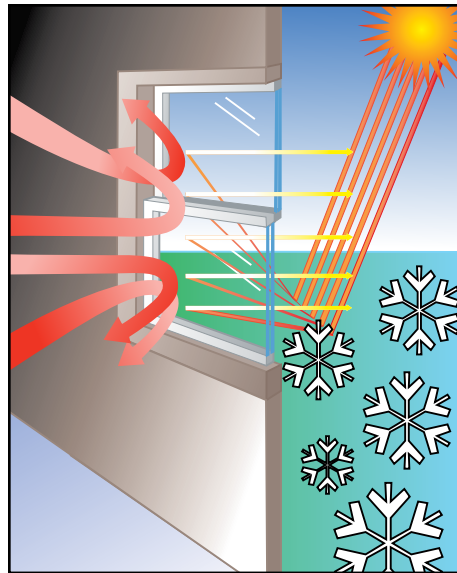

Equinox Technology

Our insulating glass technology and vinyl processing production insures the highest quality and performance in our patio door systems.

Super Spacer® Warm Edge Technology

When selecting patio doors for your home you want to look for products that give you the quality and performance your home deserves. A smart place to start is to look for doors that have the Super Spacer insulated glass system.

Super Spacer insulated glass is an advanced "Warm Edge Technology" insulated glass system found in Equinox Patio Doors. The Super Spacer insulated glass is so energy efficient that it keeps the edges of the door glass warmer, making your home more comfortable in the winter.

Keeping you cool in the summer and warm in the winter.

Low-E Glass Technology

Equinox Patio Doors offers some of the most advanced warm edge technology in our door systems. Our optional PPG Solarban 70 is a value-added Low-E product that brings energy savings and comfort to your home.

PPG Solarban 70 is engineered to provide year round comfort, keeping your home cooler in summer by keeping out unwanted solar heat and warmer in the winter

by keeping furnace heat inside.

PPG Solarban 70 significantly reduces the fabric fading effects of ultraviolet light and resists condensation and it's effects on your home environment.

So in choosing energy savings make *The Wise Choice*, choose PPG Solarban 70 Low-E glass and Super Spacer warm edge technology in Equinox Patio Doors.

Vinyl Technology

The design of the window and the quality of the extrusion insures the beauty and performance of the finished product. Equinox Patio Doors are designed and extruded by our partner, Deceuninck Inc. recognized as the world's leading extruder of vinyl window and door systems. All vinyl is produced from abundantly common natural materials and is thus an extremely eco-responsible product. All of our vinyl profiles are completely recyclable and environmental friendly.

There is strength in numbers. The Earthwise Group is a national network of locally-owned, independent window and door manufacturers. Our network covers the entire United States, but as local and regional demands differ, so do our local organizations. As independent manufacturers, we are flexible and responsive to meet those unique regional needs. Backed by one of the world's largest window extruders, Deceuninck NA, the Earthwise Group consistently meets and exceeds the rigorous standards set by Energy Star, National Fenestration Rating Council (NFRC), and the American Architectural Manufacturers Association (AAMA).
